Responsible AI Readiness Assessment

What is the NovaCompli AI Readiness Assessment?

NovaCompli's AI Readiness Assessment is a rapid, expert-led diagnostic designed to help your organisation evaluate its preparedness for Artificial Intelligence across technical, organisational, strategic, and governance dimensions. In just 3–5 days, we identify your strengths, uncover critical gaps, and deliver actionable insights to guide your AI journey—ensuring innovation never comes at the expense of ethics, security, or compliance.

Key Benefits

The benefits of engaging NovaCompli's Responsible AI Readiness Assessment include:

- **Strategic Clarity:** Understand where your organisation stands and what's needed to achieve responsible AI adoption.
- **Risk Mitigation:** Identify and address technical, organisational, and compliance gaps before they impact your AI initiatives.
- **Regulatory Readiness:** Stay ahead of evolving AI regulations and industry standards.
- **Actionable Roadmap:** Receive clear, prioritised recommendations for next steps.
- **Stakeholder Confidence:** Foster trust through transparent and accountable AI practices.

Who Should Engage?

The target audiences for these Training and Awareness are:

- Board Members & C-Suite Executives
- Risk, Compliance & Data Leaders
- IT, Security & Project Managers
- Business Unit Heads driving AI initiatives

What you receive

- **AI Readiness Snapshot Report:** High-level indicators of your AI maturity and readiness.
- **Gap Analysis:** Clear identification of strengths and areas for improvement.
- **Executive Summary:** Concise findings for leadership decision-making.
- **Recommendations & Roadmap:** Prioritised actions to accelerate responsible AI adoption.
- **Optional Responsible AI Maturity Scorecard:** Simple, visual tool to measure and track progress^[1].

How the Assessment Works

Our AI Readiness Assessment is delivered in 3 stages, with an optional fourth 'deep dive' stage

● Stage 1 - Discovery & Executive Alignment

- Executive kick-off workshop
- Review of AI strategy, business goals, and governance
- Stakeholder interviews
- Regulatory alignment checks

● Stage 2 - Rapid Assessment Workshops

- Technical and data infrastructure review
- Organisational readiness and change management
- -AI policies and ethical frameworks assessment

● Stage 3 - Gap Analysis & Findings

- Identification of strengths and gaps
- Executive summary and readout
- Preliminary recommendations and implementation planning

● Stage 4 - Optional Deep Dive

- Focused exploration of priority areas
- Additional stakeholder engagement
- Detailed remediation strategies and roadmaps
